A project on digital transformation & data collection to support FEBA in expanding and strengthening its network in the EU

“Quantifying the Impact of European Food Banks. From Farm to Fork”

The main goal of the European Food Banks Federation consists in supporting the promotion of the recovery of surplus food for human consumption, in line with the priorities indicated in the “EU guidelines on food donation” and as a contribution for achieving the SDGs.

A crucial step for reaching this objective is to gain and share **common and reliable knowledge** about the activities managed by the FEBA’s network daily, and their **impact on food waste prevention and food poverty reduction**.

The project is based on two pillars

Indicators

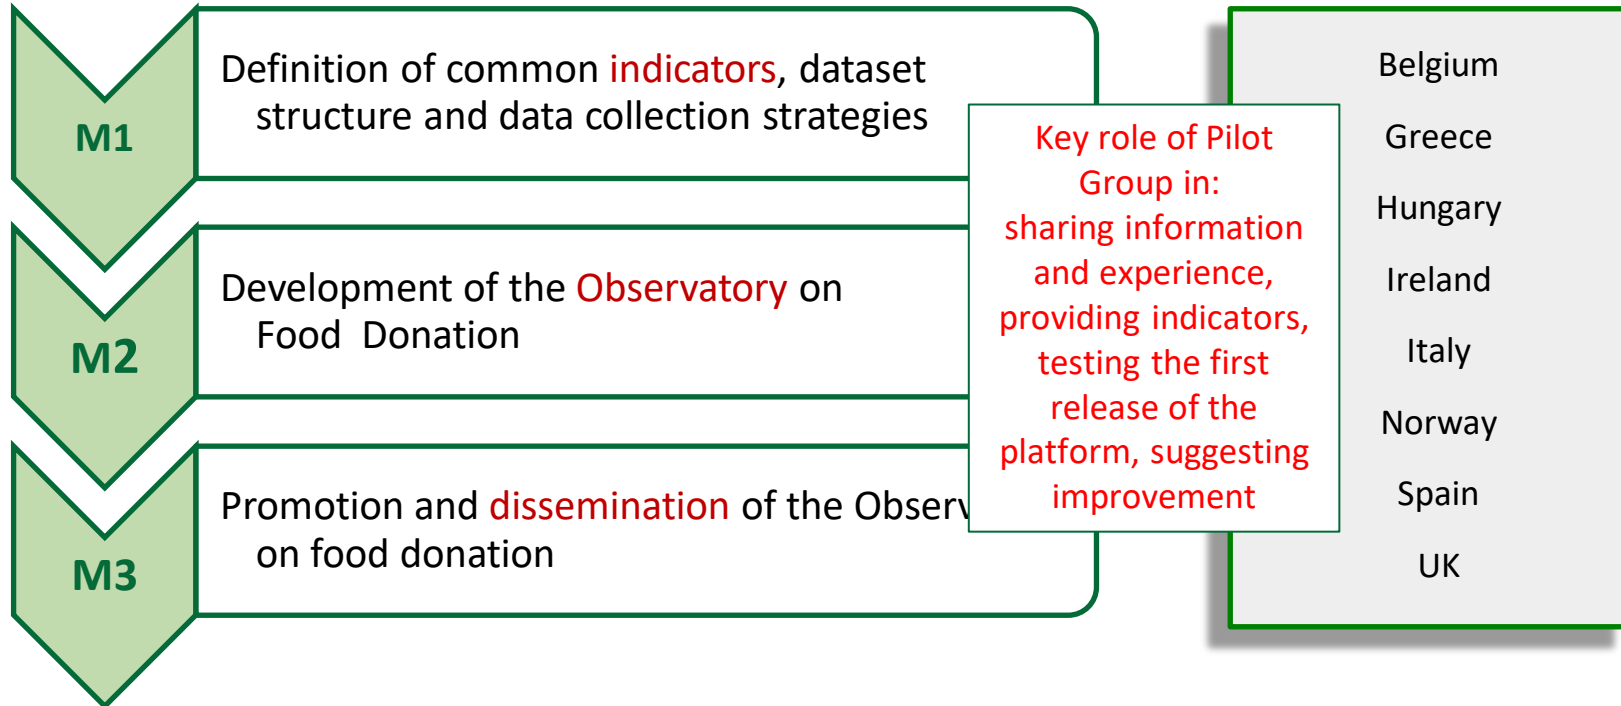

- Why measure performance
- What to measure
- How to produce data and useful information
- For whom to measure

Data collection platform

- How to operationalize the indicators selected
- How to foster ICT-acceptance (usefulness, ease of use, modularity, data visualization)

The project has got 3 milestones

Pilot Group:

Workshop & meetings March 2020 – February 2021

- 2 March: Kick-off meeting**
Brussels – (all FEBA Members)
- March: **Discussion on areas of impact covered by KPIs**
Madrid (Pilot group)
- April: **Communication: make data speak**

Workflow

Approach: progressive and participatory discussion, bottom-up + top-down approach, flexibility + vertical insights on indicators

Activity with Pilot Group: workshops, individual virtual tours and sessions, individual interviews, data collection

Backstage activity: action plan, task force meetings, collaboration with external experts, literature review and reporting, ICT infrastructure

continuous comparison with literature and experts

Year 1: outputs

February 2020 - January 2021

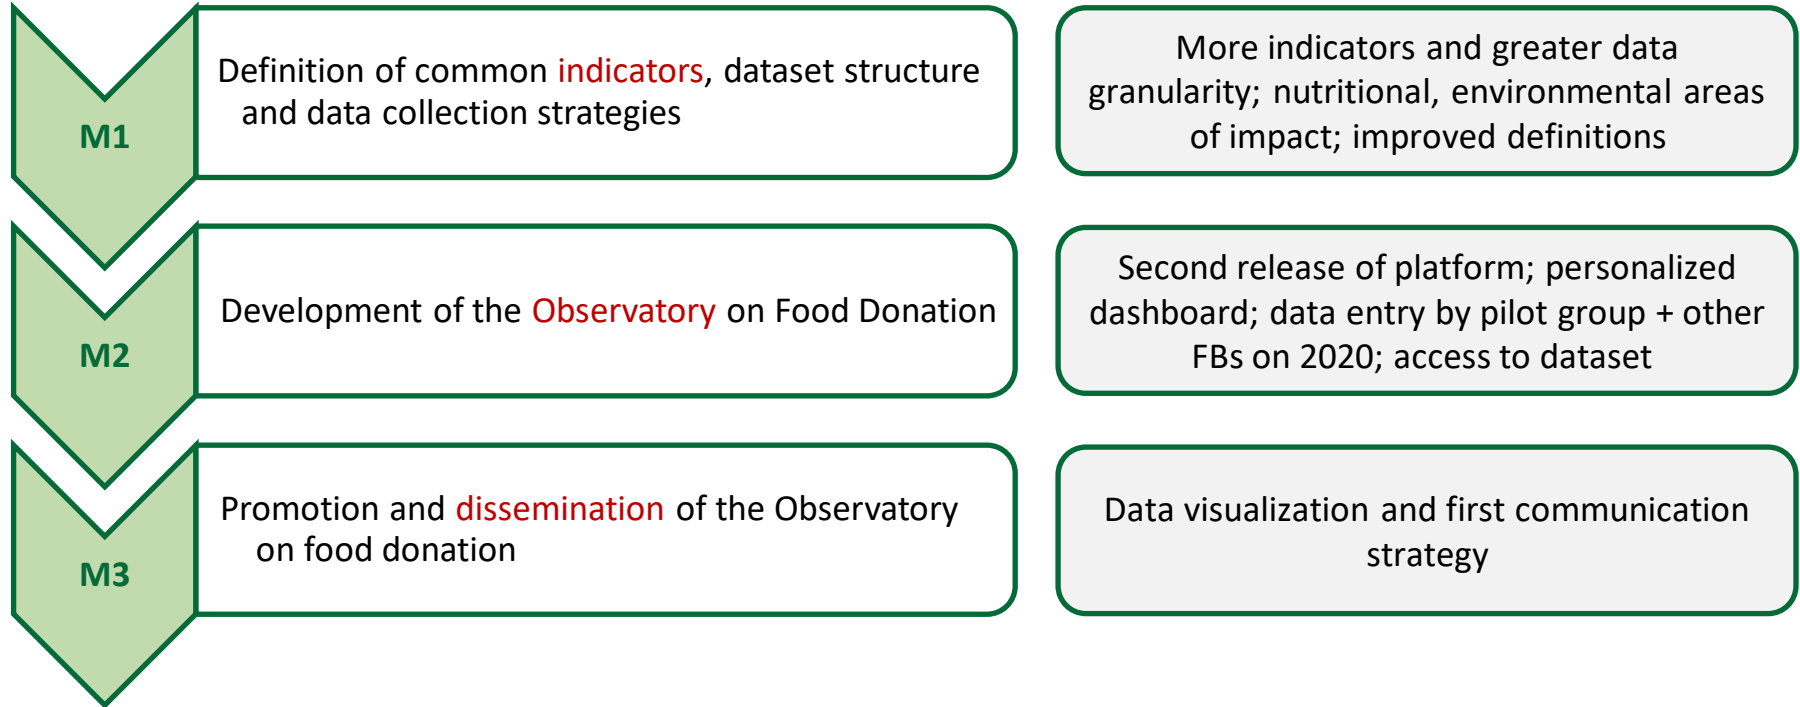

94 indicators, 50 definitions, 2 out of 4 areas of impact covered (economic, social)

First release of platform, data entry on 2019 (test with pilot group)

4 workshops with pilot group, 3 FEBA plenary events, 1 open event

Our «journey» continues...

February 2021 - January 2022

Looking for inspiration...

What's coming? (ready for v.2)

- Excel Export, not only CSV
- Missing KPI (12.3 - Other Vehicles)
- In KPIs table, display u.m.
- Let Food Banks to fill a "note" field fore ach KPI
- Self-calculated fields (like "Total number of co-workers")
- Interactive maps with Food Banks, warehouses, etc.
- Dynamic tokens (using KPIs in paragraphs)
- Food type / source / destination matrix
